

Mainsaver to eMaint Migration

What to Expect

Confidently migrate your EAM system with expert support. Custom planning, data migration, training, and go-live assistance from a trusted Mainsaver veteran and certified eMaint partner.

Mainsaver to eMaint Migration - What to Expect

Are you preparing to move on from Mainsaver?

At [EAM Expert](#), I help organizations transition smoothly to [eMaint](#) - a modern, cloud-based Enterprise Asset Management system by Fluke Reliability. With decades of Mainsaver experience and a certified partnership with eMaint, I provide full-spectrum migration support.

What to Expect from a Migration with EAM Expert

1. Discovery & Planning

- Review your current Mainsaver setup
- Define critical workflows and reporting needs
- Develop a tailored migration plan

2. Data Preparation

- Cleanse, scrub, and validate existing data
- Map fields between Mainsaver and eMaint
- Identify legacy data for archiving

3. Configuration & Setup

- Configure eMaint based on your business processes
- Customize screens, fields, and user roles

4. Training & Adoption

- Deliver targeted training for users and administrators
- Provide job aids and training materials

5. Go-Live Support

- Hands-on guidance during transition
- Post-launch troubleshooting and adjustments

Typical Project Timeline: 1 to 3 weeks, depending on complexity.

Whether you need full-service migration or just assistance in key areas, I can help you take the next step with confidence.

Let's talk about your needs and create a migration plan that works.
